SILVERPLATE™

Silverplate in use develops a patina that glows in low light settings. The classic formal design is a hotel and club standard. A stainless base metal is used making burnishing unnecessary!

Care requires a detarnishing bath periodically and daily use of a detarnishing pre-soak.

Mirror silverplated finish, lifetime warranty.

Fieldstone™

Walco Fieldstone is an application that gives flatware patterns and select holloware items a unique burnished finish. Once applied, the result is a satin antique farm or industrial chic, rustic or casual appearance.

Change any of our upscale 18/10 flatware patterns or beverage servers with this process. It is performed at our Utica Cutlery Company factory in Utica, New York, at the base of the Adirondack Mountains.

Large vibrating machines are loaded with hundreds of marble size industrial stones and pressurized water. When the flatware or holloware is removed, we have the Fieldstone finish. Flatware patterns and select holloware in 18/10 only are candidates for this process.

18/10 Stainless Flatware

18% chrome 10% nickel stainless is a European standard. The nickel content ensures resistance to staining and shines like silver for the life of the product. The flatware is grade rolled to give items tensile strength and balance.

The knives are electropolished to bring more chromium to the surface for greater resistance to staining. The knives are made of 420 type stainless so a cutting edge can be maintained.

- The larger European forks and knives are designed to accompany 10 3/4" and larger plate sizes.
- American sizes are also available.

* Available in European place settings.

* **Fieldstone**™ finish available, see page 22.
Also available in silverplate.

18/0 Stainless Flatware

18% chrome stainless flatware has 38% more chromium than 13% chrome. Since 1984 Walco has used nothing less than 18% chrome for all forks and spoons. Our heavy weight and medium weight quality patterns are machine finished for smooth, polished surfaces. Fork tines and spoon bowls are graded for added tensile strength and balance. The knives are 420 type stainless and electropolished. All 18% chrome patterns are magnetic, providing the opportunity to protect your flatware investment with the use of magnetic retrieval systems. Our selection of 18/0 patterns show our heaviest, higher end patterns first followed by our more economical offerings.

Can be used to transform **any type of chafer** to induction.

Features for both units:

- Time and temperature programmable up to 9 hours and from 100-600 watts
- Very low amp draw
- Can plug in 7-10 units on one 20 amp circuit

INUNITCBB Countertop unit is 5.25" x 15.75" x 18"

- Specifically designed for any induction body chafer
- Magnets hold chafer body in place
- No "in use" shifting of the chafer

WIINCUKIT Portable Induction Unit

Walco has designed a portable induction unit to service some of our smaller chafing dishes and urns when used with a burner stand. The WIINCUKIT was designed by removing the metal ring and magnets from the INUNIT, a small spacer is used instead to move the WIINCUKIT into the correct position to properly heat chafing dish offerings. The WIINCUKIT retains all of the unique features of the INUNIT in a more space efficient configuration.

Crate™

Build a hot buffet set up with our Crate™ warming towers and accessories pieces. Food can be presented on the grill tops or in fancy casserole dishes or pans. The towers are heated with canned fuel. They are designed in the traditional carry crate look using modern satin stainless steel with black accent pieces. The stainless is dishwasher safe for ease in cleaning and very durable for repeated use. Please see our chafer storage boxes for storing your Crate items when not in use.
